A15 GARDEN VEGETABLES**Dianne Jabs 952-492-2540****Betty Huebner 952-492-6329****Perishable Item Drop Off: Tuesday July 25, 1-5 pm****All Premiums: \$3.00; \$2.00; \$1.00 *except as noted*****One entry per lot**

NOTE: Decayed, injured, or inferior specimens must not be exhibited, and when such specimens appear in collection, the entire exhibit may be disqualified.

When the number of competitors in any lot is less than the number of awards offered, the judges may, at their discretion, award the lower prizes, omitting the higher ones; but premiums will not be awarded on inferior collections or specimens, even if there is not competition.

A15 GARDENING VEGETABLE EXHIBITS:

BEANS, SNAP: Harvest before constrictions appear between seeds, when seeds are about half grown. Ends of pods should not be broken off in picking. Pods should be uniform. Pods may be wiped clean, but not washed. Trim stems to a uniform ¼ to ½ inch in length.

BEETS, CARROTS: Root crops should be mature but not overgrown, pithy or coarse in texture. Tops trimmed off ½ inch above crown. Side roots trimmed off but not the taproot. Roots carefully washed, but not scrubbed.

BRUSSEL SPROUTS: Firm, bright green sprouts, all uniform size & shape.

CABBAGE: Stems cut about ¼ inch below head. Remove blemished or broken leaves, but care should be taken not to peel the heads too much. A few outside wrapper leaves are desirable. Specimens may be washed.

SWEET CORN: Select ears that are well filled out to the tip. Kernels should be milky and juicy. Remove outer husks but allow a short shank and the inner husks to remain.

CUCUMBERS, PICKLING: Select fruits 2-4 inches long. Specimens should be the same stage of maturity and uniform in size, shape and color.

CUCUMBERS, SLICERS: Select fruits that are straight, dark green, and 5-10 inches long. They should be uniform in size, shape, and color.

KOHLRABI: Roots removed just below the ball. Remove all but the upper 4-6 leaves. Select specimens that are uniform, medium size, and not hard or woody. Skin should be easily punctured by thumbnail. They should be cleaned, but not washed.

GARLIC, ONIONS: Have specimens mature and thoroughly cured. The neck should be small. Do not peel to give slick appearance. Only such outer scales that are broken or discolored should be removed. Small basal roots should be left intact but trimmed to a uniform length of ½ inch. Wipe or brush but do not wash.

PEAS: Harvest when bright green in color with pods that snap and do not bend with crisp flesh. Ends of pods should not be broken off in picking. Pods may be wiped clean, but not washed. Trim stems to a uniform ¼ to ½ inch in length.

PEPPERS: Select firm shiny peppers with no signs of dehydration. Trim the stem to ½ inch. They should be uniform in size and shape.

SQUASH, SUMMER: Select small to medium sized fruits when the rind is soft and easily punctured with the thumbnail. Leave about ½ inch of stem and wipe fruits clean.

SQUASH, WINTER, PUMPKINS: Select mature specimens where the rind resists pressure of the thumbnail. Fruits should be free of defects. Leave stem attached to the fruit.

TOMATOES: Select fruits that are uniform in size, shape, and color. Fruits should be perfectly shaped and free of cracks and blemishes. Trim stems to ½ inch.

A17 FRUIT

Each variety must be correctly labeled with names. Exhibitors may replace fruit that shows a tendency to spot or decay with fresh fruit, at any time during the fair, except when the judges are working on the class to which it belongs.

Decayed, injured, or inferior specimens must not be exhibited, and when such specimens appear in a collection, the entire exhibit may be disqualified.

When the number of competitors in a lot is less than the number of awards offered, the judges may, at their discretion, award the lower prizes, omitting the higher ones; but premiums will not be awarded on inferior collections or specimens, even if there is no competition. Shape, color, size, quality, uniformity, and conformity to a desirable type for the variety are the basis for judging. Overgrown specimens are not desirable. Select specimens normal and uniform as to size, color, and quality.

Please include an identification tag with the type (variety if appropriate) of the fruit.

Exhibitors must have the exact number of stalk or stems of blooms called for in each exhibit, in a clean, suitable container (**no fruit jars**), otherwise the exhibit will be disqualified. In this class the flower, stem, and foliage are judged. Foliage can be used but not below the water line. A bud showing color is counted as a bloom. Bloom and uniformity for the variety are the points the judge considers. All plants and flowers must be grown by the exhibitor. Exhibitor must furnish own container. A bloom or blossom means an individual flower, one on a stem. A cluster means several blooms growing close together on the main stem. A spike means a flower structure with a stem-less glower on a common lengthened stalk, as gladioli or snapdragon. A stalk is a stem with one or more blooms or buds. You may replace flowers during the fair.

Vases MUST BE weighted with clear or colored marbles to avoid tipping and should fit the size of the bloom.
